

Phonics Booster

Description:

This intervention will help to develop your child's understanding of phase 5 phonics. The children will work for about 20 minutes in each session recapping the sounds they know and learning to read and write new sounds. They will be encouraged to read both real and pseudo words and identify the digraphs and trigraphs within words.

Intended Outcomes:

- To ensure your child is able to identify the phonic flash cards up to Phase 5.
- To ensure your child can use phonics to blend and support their reading
- To ensure your child is able to use phonics to segment words into their sounds for spelling

What can you do to help?

- Practise the sounds in your child's phonic pack.
- Practise reading and writing using phonics.
- Play games involving real and pseudo words such as <https://www.phonicsplay.co.uk/Phase5Menu.htm>
- Talk positively about phonics and read as often as you can at home.
